

# INTERNET SAFETY & CONTENT RULES

## Browse and Post Mindfully

Everything you do online is tracked and recorded. This information is all part of your digital footprint and give others digital picture of who you are. Do you know what kind of trail you're leaving behind?

## Behave Online

When you're online it may seem like normal rules are easier to break without consequences. Copyright is a real law. Are staying off inappropriate sites and using & sharing content correctly?

## Be Aware of what you Share

Be careful about sharing personal information online. Privacy is important. Do you understand the difference between personal and private information? Which are you giving away?

## Keep Kind in Mind

Cyberbullying is: repeated and unwanted mean or hurtful words or behavior that occur online (through texts, social media posts, online chat, etc.). Always be kind and friendly online; no exceptions. Everyone's interactions can be traced and reported.

## Decode your Media to Spot Fake News

Not everything you read online is true. Sometimes even ads are disguised as news. It's OK to be skeptical of the information you find online. Question the purpose of the words and images you see to find out if they are from a credible & reliable source.

## Before you post THINK

T = True  
H = Helpful  
I = Inspirational  
N = Necessary  
K = Kind

Does what you're posting meet this criteria?
